

STORM SNOW

There's 20-30 cms of fresh snow in the forecast this weekend and we're looking forward to its soft goodness. We've had 15-20cms of new snow already this week and combining that with the forecasted totals should mean some excellent sledding coming up. Temps look to be seasonally average, with trends toward even cooler temps by the end of the weekend and into early next week. Avalanche conditions remain at moderate for now, but are likely to go up when the big snow hits. Grooming ops are in full swing and our crew is ready to keep the trails smooth and parking lots clear.

Snow & Weather

SNOW AND WEATHER

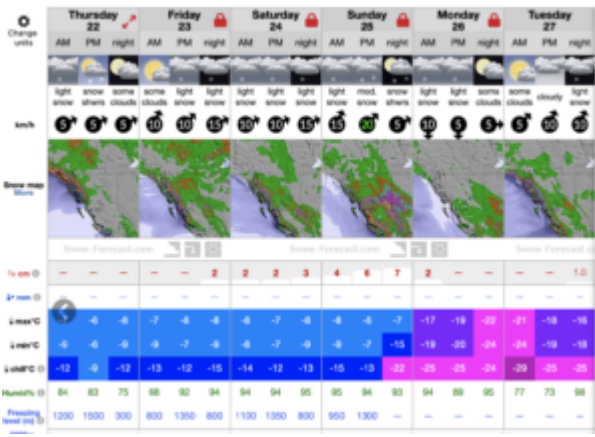

We've had 15-20cms of snow in the past week and there's 20-30cms more in the forecast set to fall by Monday. Add that up and you've got a pretty decent amount that could get freshies flying over the bars again. Temps remain cool and look to go cold by Monday; this will help preserve what we've got.

Fresh snow in Gorman on Feb 15

Fresh snow in Gorman on Feb 15

snow forecast for northern Golden ranges on Feb 22

Staging Areas Latest Info

Quartz Creek

Conditions: Pockets of soft snow. Alpine is where it's best.
